

Improve the geographical diversification of your investments

Offshore Investments

Introduction

Should you wish to improve the geographical diversification of your investments we will buy and sell securities on your behalf, taking your offshore investment objectives and risk profile into consideration. This is done by making use of one of our core offshore investment portfolios through direct investments or via our institutional investment facility. Alternatively, if you have specific objectives, a bespoke portfolio will be designed to meet your requirements.

While some listed Exchange Traded Funds (ETFs) offer offshore exposure, you may prefer personalised segregated investment portfolios. Our range of offshore providers lets you select the solution that best meets your particular requirements, with access to all major global equity markets, ETFs and mutual funds.

Offshore Non - Discretionary (Self - Managed) Portfolios

If you want to participate in the management of your offshore investments, we let you take the reins. We are always available to execute your transactions or to discuss investment opportunities (Minimum \$1 000).

Offshore Discretionary (Managed) Portfolios

We will buy and sell securities on your behalf, taking your investment objectives and risk profile into consideration.

Global ETF Portfolio (Minimum \$20 000)

This is a global diversification portfolio aimed at long-term sustainable capital growth. Investors are placed in the MSCI World Index tracker fund which exposes the investor to a broad range of developed market companies around the world, and allows the investor to diversify internationally and seek long-term growth.

Global ETF Portfolio Multiple (Minimum \$20 000)

This is a global diversification portfolio aimed at long-term sustainable capital growth. Investors are placed in an S&P 500 index tracker fund which exposes the investor to a broad range of large cap US listed companies, and allows the investor to diversify internationally and seek long-term growth.

The investor is also exposed to the MSCI Europe ETF which offers exposure to a broad range of large, medium and small cap stocks within the developed market countries within Europe. There is further exposure to the MSCI Pacific ETF which offers the investor comprehensive access to large, medium and small cap stocks in Australia, Hong Kong, Japan, New Zealand and Singapore.

International Direct Share Portfolio (Minimum \$80 000)

This is a high conviction international portfolio focused on maximising risk adjusted returns to the investors over the medium to long-term by investing in global listed equities. The returns of this portfolio are based on the ability of world equity markets indices to deliver returns in excess of inflation and the ability of the portfolio manager and our research team to identify and take positions in undervalued securities.
